Annual Celebration of Conservation Meeting and Banquet

The 80th Annual Celebration of Conservation Meeting and Banquet was held on November 7, 2024, at Lindsley's Banquet Barn in Dresden, Ohio. Van Slack acted as the Master of Ceremonies, warmly welcoming the guests and introducing distinguished attendees, including local officials and conservation representatives. The evening featured a buffet dinner catered by Doug Lindsley, complemented by an invocation led by Dorothy Montgomery. A total of 90 individuals were in attendance.

Christie Suchora from the USDA delivered a presentation on drought programs, followed by guest speaker Greg Burns from Nature's Image Farm, who provided valuable life lessons learned from beekeeping. Awards were presented across various categories.

Scholarship recipients were recognized, along with the families in attendance who represent Ohio Historic Family Farms. Election results were shared, confirming the re-election of Mark Weiser and Mark Sterling for three-year terms beginning in 2025. Thank you, Rod McDaniel, for your candidacy for supervisor. We value your commitment to preserving our natural resources.

Tree Shelters - Are They Worth The Cost?

The Muskingum SWCD has been selling tree shelters for many years. To provide a good comparison of sheltered versus non-sheltered trees, we asked several past tree shelter customers why they continue to use shelters year after year.

One farmer that we visited has been planting trees since he purchased the property in 2015. As time has gone on he has increased the percentage of sheltered trees. He sees multiple benefits from using the shelters, including what is likely the most important- protection from the deer. Small twigs are high in nutrients throughout the year, which makes these desirable snacks for the deer, especially in late winter. The shelters also discourage the bucks from rubbing the trees. In addition to deer protection, the shelters also increase growth significantly.

In the spring of 2018, American Plum were planted in several areas of the farm, and in just one growing season those that were sheltered have outperformed the unsheltered ones by at least a four to one ratio. The faster the trees grow the quicker they will produce mast for wildlife feed. There has also been a significant reduction in damage caused by moles, voles, mice and rabbits. While these small animals typically won't eat the tree, they will strip the bark to eat, which in turn essentially strangles the trees.

This landowner in particular has seen, and continues to see, the value in tree shelters. In addition to increased growth rates, deer protection, and other animal protection, shelters have also greatly reduced the labor needed to control weeds around his trees.

We are also excited to announce that we were able to place a bulk order this year and reduce costs for our customers. With this bulk order we have minimized the sizes that we are offering in order to maximize savings. This year we are only offering the 5' shelters, which we are able to offer at the same price as the 3' shelters last year.

Tree shelters can be picked up during tree seedling pickup. Orders of 50 or more shelters, we are offering a discount to \$10 per shelter.

Sheltered Tree

Bur Oaks planted within 50' of each other on a farm in northern Muskingum County. The tree on the left was placed in a shelter at that time, while the one on the right was not. The one on the left has grown out of the top of the 5' tall shelter and is well on its way to the 6' mark while the one on the right just barely reaches the 1' mark.

Unsheltered

CHECK OUT WHAT'S NEW FOR 2025

Buttonbush

Viburnum Nannyberry

Northern Bayberry

This year the tree seedling sale will again include trees beneficial to pollinators as well as wildlife. There will be new species that we have not offered before, or it has been a few years since we sold them. These new species include Buttonbush, Viburnum Nannyberry, and Northern Bayberry.

Buttonbush, *Cephalanthus occidentalis*, is part of the coffee family and has a tiny flower that blooms all summer. The Buttonbush provides nectar for a variety of pollinators including skippers and butterflies and is a larval host for several moths.

Viburnum Nannyberry, *Viburnum lentago*, is a native plant that provides pollen in the early spring months. Along with the pollen the Viburnum Nannyberry also provides berries for birds and other wildlife in the fall.

Northern Bayberry, *Myrica pensylvanica* 'Bayview', produces a winter persistent fruit and retains its leaves late in the season, which make it valuable for food and shelter for wildlife. The Bayberry also provides food and shelter for beneficial insects. The berries are considered toxic to humans, but eaten by a variety of birds including turkeys, woodpeckers, and numerous songbirds.

The pollinator value of these trees comes with flowers that also provide aesthetic values. All these species have flower blooms that appear in the spring and lead to berries in the late summer, fall and even into winter with a few of the species. This provides aesthetic value throughout a large portion of the year. Several of these shrubs can also provide excellent screening properties, which can provide visual or wind breaks.

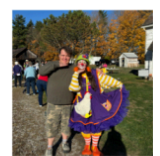

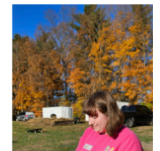

These species also make great wildlife buffers along the edges of woods. Planting these small trees and shrubs creates a buffer effect as well as some transitional habitat from mature woods to open field. This transitional habitat plays a huge role in providing space for wildlife to hide from predators. All of these trees and shrubs produce seeds or berries that are consumed by wildlife including song birds, turkeys, small mammals and deer.

It is with a heavy heart that we announce the departure of our Forestry and Wildlife Specialist, Robert Boehle. On January 10, 2025, he will be leaving us to pursue new opportunities with the Ohio Division of Forestry. We wish him all the best in his new role.

*We will
miss
you*

On October 26, Marshall Greens Garden hosted the first annual end of season Harvest Party to recognize leaders in the 2024 Garden Olympics, honor notable volunteer hours, and celebrate all partners, participants, and volunteers of the Urban Greens program. With the help of seasonal garden coordinators, a youth gardener sponsored by The Eagles, and 200 volunteers (with 1,208.75 volunteer hours), the Urban Greens program was able to donate ~13,184 lbs. of produce to the community, most of which went to food pantries in need throughout the county. Other untracked produce was harvested directly from our sites by community members themselves to use as needed. We're thrilled to see more folks in our community out in the gardens, learning to grow and prepare fresh produce and reaping the benefits of healthy soil!

Please Welcome LaTrell Davis, AmeriCorps VISTA Member

Hi, I'm LaTrell Davis, joining the Muskingum Soil and Water Conservation District team. Originally from Middletown, Ohio, I live with my fiancé, Autumn, and our two children, Abishai (2) and Ashaiya (4 months) in Zanesville. I'm pursuing a Master's in Occupational Therapy and coach wrestling at Muskingum University. I enjoy outdoor activities, woodworking, and spending time with family.

My passions include mental health, community engagement, and helping others enhance their occupational performance. I aim to help people lead meaningful lives and improve their quality of life. As a volunteer AmeriCorps Vista member, I'm grateful for the chance to positively impact this community.

2025 FARMLAND PRESERVATION

The Clean Ohio Local Agricultural Easement Purchase Program (LAEPP) provides funding to assist landowners and communities in preserving Ohio's farmland, our most vital resource. The program purchases agricultural easements from landowners who volunteer to keep their land in agricultural production in perpetuity. In 2013, the program was changed to the Local Agricultural Easement Purchase Program (LAEPP) to reflect the increased role of the Ohio Department of Agriculture's (ODA) local sponsors in farmland preservation: counties, cities, townships, Soil and Water Conservation Districts and land trusts.

Muskingum Soil and Water Conservation District is a local sponsor. Please look on our website, www.muskingumswcd.org, for our intent to apply form and more information regarding this program. Also, check out Ohio Department of Agriculture Website, <https://agri.ohio.gov/programs/farmland-preservation-office>.

If you are interested in applying or learning more about the program, please call Melissa Devore to schedule an appointment on January 10th or 15th.

MUSKINGUM SOIL AND WATER CONSERVATION DISTRICT

SUMMER SCHOLARSHIP INTERNS NEEDED

First, we are looking for up to three Volunteer Interns to assist MSWCD staff with a variety of projects and programs. Activities might include, but are not limited to, agriculture field visits, forestry management visits and plan creation, wildlife habitat establishment, water quality monitoring, soil sampling, pollinator plantings, youth camps, educational events, urban agriculture, and more. To be eligible, students must be high school graduates and in college. Those interested are required to fill out an application, and submit a resume and short essay. Students must be able to pass a criminal background check. Students in agriculture, environmental, and/or natural resources management are encouraged to apply.

While these are volunteer internships, there is a scholarship opportunity available. The MSWCD Board has approved granting, at a minimum, a \$1,000 scholarship to each Volunteer Intern who successfully meets the requirements and standards for the position and completes the minimum required hours (100 hours within 10 weeks). Students will receive the scholarship check to spend on their educational needs as they see fit. A copy of the student's 2025 fall college class schedule will be required for college enrollment verification. If a student's school requires more than 100 hours for an internship, that can be obtained as well.

The second internship opportunity is funded through the MSWCD and the Muskingum County Auditor's office and is a paid part-time position, lasting 10-12 weeks (total number of hours yet to be determined). This intern will assist our Forestry/Wildlife Specialist with forestry inspections and plans. To be eligible, students must be high school graduates and in college majoring in forestry or an environmental or conservation science field. Must be able to pass a criminal background check and a driving record check and be insurable to drive a District vehicle.

All Internship positions are flexible as to what days/hours must be worked, as long as the required hours are obtained within 10-12 weeks. To be considered for either of the internship opportunities, the application, resume and essay must be submitted by March 14, 2025. Applicants will be contacted for phone interviews before the end of March. For more information about the internships, please contact lisa.crock@muskingumswcd.org or call 740-454-2027. Applications are available online.

2024 DROUGHT MANAGING PASTURES THROUGH THE DROUGHT AND PLANNING FOR THE FUTURE

The extreme drought of 2024 took its toll on hay and pasture fields across much of Ohio. Many producers were forced to make difficult decisions and take a hard look at their operations. As we move into winter, it is time for producers to start planning for the next year. In this workshop, we'll discuss pasture management and opportunities for producers to improve or enhance their operations that will help them withstand extreme and unexpected weather conditions.

FORESTRY AND WILDLIFE ROUNDTABLE

**"Building Forest Roads and Trails that Stand
the Test of Time"**

**Thursday, February 13, 2025
at 6:00 PM Via ZOOM**

Join Muskingum SWCD as we welcome Bob Mulligan, Forest Hydrology Manager with the ODNR Division of Forestry, to discuss building roads and trails. He will cover things like proper layout, water management and stream crossings.

Join us to learn how to manage roads and trails to ensure stability and access in the long term.

Visit our website at www.muskingumswcd.org/Events/ for more information and to register.

Upcoming Conservation Program Application Deadlines

January 31, 2025 is the application signup deadline for applying for the NRCS Environmental Quality Incentive Program (EQIP) and the Conservation Stewardship Program (CSP). EQIP is the federal financial assistance program that helps to get needed conservation practices applied on the land. CSP is 5-year contract geared toward enhancing the management of different land uses. For more information or to apply, stop by the office, 225 Underwood Street, Suite 100 or call us at 740-454-2767 Ext. 3.

Please Welcome Karen to Southeastern Ohio!

Karen Simpson-Reyes recently joined the Natural Resource Conservation Services (NRCS) as the new Resource Conservationist for the NRCS Area 3 Office here in Southeastern Ohio. She graduated with a bachelor's degree in Agronomy from the University of Puerto Rico in 2020. Since joining the NRCS in 2021, Karen has worked as a Soil Conservationist in Northwest Ohio. In April of 2024, she advanced to her current role as a Resource Conservationist, specializing in the Conservation Reserve Program (CRP) for 16 counties. She will be working with Lori, Dee and Jencel in Muskingum and Morgan Counties. Karen is passionate about her work, learning from farmers, and exploring new places. When you meet Karen in the office or out in the field, please join us in welcoming her to the beautiful hills and friendly people here in Southeastern Ohio!

A Note of Thanks from Lori Ryan-Griffin

As of January 10, 2025, I plan to retire from my 31-year Federal career. I spent the first two years of my career working as an Inland Fisheries Peace Corps Volunteer in the Central African Republic. The remaining years, I spent working as a Soil Conservationist, temporary employee and District Conservationist for the Soil Conservation Service and the Natural Resources Conservation Service in Muskingum and Morgan Counties.

It has been my privilege to work with many wonderful farmers, landowners and co-workers since I started my career with the SCS/NRCS in 1987. I want to say "Thank you" to those of you with whom I have worked over the years. Thank you for sharing with me the challenges, goals, and dreams you have for your farming operations and properties. Thank you for trusting me to provide you with friendly, sound conservation technical assistance and federal program assistance. Thank you also for all that YOU taught me as well. I have learned much from my customers!

An Acting District Conservationist will be appointed until a permanent District Conservationist is selected. You remain in good hands, though, with the excellent NRCS team we already have in place to serve both counties!

For Muskingum County, your primary NRCS contact will be Jencel Rodriguez-Cruz, Resource Conservationist. Hopefully you have already had the chance to meet Jencel or to speak with him this past year at our Zanesville NRCS Office. Jencel may be reached at 740-454-2767 Extn 3 or at jencel.rodriquezcruz@usda.gov.

For Morgan County, your primary NRCS contact will continue to be Dee Wiseman, Soil Conservation Technician. Dee usually works out of Morgan, so she may be reached through the Morgan SWCD Office at 740-962-4234 or at dee.wiseman@usda.gov.

Thanks again for allowing me to work with you and to serve you. It has been my pleasure! I look forward to crossing paths with you again at a County Fair, a Field Day, or maybe even at the grocery store. May God bless you!
